March 19, 2020, Update 3.20.19

Update on WV Tele Mental Health Therapy, WV Supports for At-Risk Populations, and Information for Licensed Social Workers

NASW WV is a key member of a group of organizations identifying responses at the federal and state levels to improve access to health and mental health services, and to support at risk individuals and families -including low-income and hourly workers- and communities.

The group’s strategies were in a letter to the Charleston Gazette-Mail:

- Hold daily press briefings; Waive copays and coinsurance for coronavirus testing and related visits; Promote telehealth; Bar utility shutoffs and evictions; Suspend redetermination of eligibility for SNAP, WIC, Medicaid, TANF, and CCDF child care services; Provide good cause exemptions for SNAP work requirements and time limits; Utilize contingency funds to provide outreach, education and testing; Waive the one week waiting period for unemployment insurance (UI) benefits; Waive state policies that terminate a child’s eligibility for CCDF child care subsidies based on absent days; Adjust payment policies to child care providers; Suspend charging those in prisons and jails for phone calls.

- In the longer term: Pass paid sick days policies; Protect and expand Medicaid; Restore funding to public health; Implement paid family and medical leave for public and private employees.

We discussed numerous strategies with WV DHHR on 3/18 and are confident that every angle is being explored/enacted to expand access to health, mental health and social supports, and to ease onerous requirements. Stay tuned!

Telehealth: A 3/17 WV Medicaid Release Memo allows practitioners “to use live video conferencing or telephonic service in the member's home.”

Unemployment Benefits Gov. Justice’s Executive Order directs WorkForce WV to waive or flexibly interpret regulations to allow immediate access to unemployment benefits for eligible affected workers for the duration of the emergency.

State officials have directed members of the public to a landing page dedicated to information about coronavirus in West Virginia.

Even more information is at CDC’s Situation Summary or at DHHR’s COVID-19 information hotline, 1-800-887-4304.

Absentee Voting: Secretary of State Warner has issued detailed instructions about how to obtain a ballot: https://sos.wv.gov/news/Pages/03-19-2020-A.aspx

Contact your County Clerk SOON to request a ballot to be mailed to you!
Telehealth: WV DHHR Bureau for Medical Services (Medicaid/CHIP) issued the following notice on March 17th:

Due to the World Health Organization declaring Coronavirus disease a pandemic, the WV Bureau for Medical Services is allowing all existing telehealth services listed in the BMS policy manual, and the telehealth services temporarily approved during the COVID-19 pandemic, referenced in BMS release memos, to use live video conferencing or telephonic service in the member's home. Place of service 02 for HCFA-1500 or DCPT plus -GT modifier combination for UB04s should be utilized on all telehealth billings.

Please refer to the complete memo link above for additional information.
View all BMS memos at: https://dhhr.wv.gov/bms/News/Pages/default.aspx

The WV Insurance Commissioner has issued the following bulletin:
Insurance Bulletin No. 20 – 03 - Telehealth Services and Coronavirus (COVID-19)

House Bill 4003 (2020) was passed by the West Virginia Legislature on March 7, 2020 and mandates coverage for telehealth services. Although House Bill 4003 has not yet been signed into law by the Governor and, therefore, has not yet gone into effect, the Commissioner requests that health insurers immediately review their telehealth or telemedicine services in light of the law’s anticipated, impending implementation and the COVID-19 crisis. Telehealth services or telemedicine may be a useful tool to evaluate or reassure patients in alternative settings or to help patients and providers decide who needs to be seen in the hospital or provider office, considering social distancing and other precautionary measures in place during this crisis.

The contact person for this bulletin is Ellen Potter, Director of Health Policy, at (304) 414-8480

It is not entirely clear that this includes or adequately addresses mental health therapy. Much depends on the policies of individual insurers.

Another piece of legislation regarding MH parity also passed during the WV legislative session largely to clearly that PEIA is included. Federal law which excluded state plans like PEIA has been in place for many years.

From NASW WV as you negotiate with commercial insurance plans:
Rationale for expanded tele mental health therapy in West Virginia -including audio-only therapy:

- Many areas of the state do not have adequate broadband service to utilize video modalities
- Low-income residents often cannot afford the cost of service plans or equipment
- In more urban communities many people are working from home and broadband systems can become overloaded
• Providing therapy through telehealth, as well as **telephone therapy**, should be available to all during this crisis
• Providers and insurance carriers should **not** impose specific requirements for additional certification or training on therapists regarding the use of telehealth technologies -or on the specific technologies utilized to deliver services- including limitations on audio-only or live video telehealth
• Rates of payment to providers for services delivered via telehealth should not be lower than the rates established for services delivered via traditional in-person modalities
• Insurers should notify providers with specific instructions necessary to facilitate billing for expanded telehealth services

**At the federal level**, we have received the following updates from our national office and from CMS:

**Update from NASW National (3.18.20):**
**Further clarification on the new CMS guidance on telehealth, and the use of phones to provide telehealth and teletherapy.**

Clinical Social Workers and their clients may use video apps such as Facetime and Skype and the like for teletherapy. They do not need to use the same HIPAA-compliant video set-up that is typically required. However, phone-based services must include both video and audio capability. Therefore, an audio-only therapy session may not be reimbursable. NASW continues to advocate for the use of audio only. Please see the COVID page of the national website for updates: [www.socialworkers.org](http://www.socialworkers.org)

As regards interstate teletherapy and loosening state licensing rules around this due to the pandemic, NASW has been working with ASWB to provide information to members about emergency waivers, etc. This information will go on the NASW-national COVID website, as will updates on this topic.

Finally, there is the issue of telehealth parity. A section on this will also be updated on the NASW-national COVID website.

As for the social justice implications of COVID, we are discussing these topics with our Social Action Committee and will likely issue a public statement and take other actions to ensure economic relief and additional supports. Through our channels we will be providing updates and action opportunities. We will surely keep you all in the loop on this important dimension of the crisis and our nation’s response to it.

**From NASW Assurance Services, Inc. (malpractice risk insurance)**
(3.18.20): During this time, the NASW Risk Retention Group has been receiving many policyholder calls and questions about RRG coverage for practicing Tele-therapy to serve their clients.

In response, we have been working closely with our licensed representatives and call center staff to assist them in responding to policyholder questions, and we are developing online tools, resources and FAQs to provide more in-depth information that should be available soon. We will keep you apprised as these resources are published and disseminated.

In the meantime, we want to remind our policyholders that the RRG professional liability policy provides coverage for Tele-therapy as long as it is an accepted practice conducted according to the individual practitioner’s state regulations, state licensing board requirements, and HIPAA privacy standards which vary by state and are continually evolving.

**Further details from CMS:**

(3/18/20) The Centers for Medicare & Medicaid Services (CMS) is taking action to protect the health and safety of our nation’s patients and providers in the wake of the 2019 Coronavirus (COVID-19) outbreak. CMS has released a [Virtual Toolkit](https://www.cms.gov/newsroom/fact-sheets/medicare-telemedicine-health-care-provider-fact-sheet) to help you stay up-to-date on CMS materials available on COVID-19.

For more information on COVID-19 visit:

- Coronavirus.gov
- USA.gov

This guidance, and earlier CMS actions in response to the COVID-19 virus, are part of the ongoing White House Task Force efforts. To keep up with the important work the Task Force is doing in response to COVID-19 click here [Coronavirus.gov](https://www.coronavirus.gov).

For information specific to CMS, please visit the [Current Emergencies Website](https://www.cms.gov/newsroom/fact-sheets/medicare-telemedicine-health-care-provider-fact-sheet).

(3/17/20) **CMS has also issued the following information about telehealth for Medicare beneficiaries:**

  - CSWs can provide teletherapy to beneficiaries if the client is in their home.
  - They can also see new or existing patients.
- Telephone/audio only does not appear to be reimbursable; CSWs must use a video conferencing platform.
- HIPAA requirements are also eased.

From the WV Board of Social Work:

Using Technology to Provide Services Remotely
Some clients (or you) may prefer to provide services via telehealth / teletherapy for a period of time. The following are some general considerations you as clinicians will want to consider now:

- Discuss a plan in advance of the need to limit in person contact, including arranging for phone or video sessions. Plan how to stay in touch with your clients and their families during an outbreak or quarantine and ensure your clients are aware of your policies.
- If you do not currently provide services in this manner, check with your payers to verify that they will reimburse for services provided this way.
- Use of HIPPA-compliant technology is a must and special care must be taken to ensure confidentiality is maintained.
- Review your malpractice insurance policy regarding provisions around teletherapy and where it is provided (for example, from your home in the event that you cannot use your office due to any quarantine or containment requirements in your area).
- If your client resides in another state, most states require you be licensed in that state and you should check with the licensing board of that state.

Other resources that may be helpful include:

- NASW Code of Ethics with 2017 highlighted revisions regarding the use of technology in the provision of professional services: https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Highlighted-Revisions-to-theCode-of-Ethics
